The DataPower Rangers (XPath, Transformer and Encrypto)

- Concerned about security in your Web Services?
- Have you experienced the pain in your XML parsing?
- Having trouble demystifying all the ESB products?
- Want to integrate your legacy applications as Web Services?
- Not sure how to optimally bridge your Web Services to an Enterprise Service Bus?

Secure your ESB's future with
iSOA Group's
DataPower Rangers!

- We will work with you to design and implement the secure solution you need for your internally and externally facing Web Services. We are all about policy enforcement and governance for your SOA and ESB solution.
- DataPower acts as an Enterprise Service Bus, providing the ESB functionalities of transformation, routing and security.
- **iSOA Group's** Rangers' will *customize* the ESB functionality, enabling you to deliver an open, integrated, Web-accessible solution for your customers.
